# Construction of Staff Houses at Modogashe Sub-County Hospital, Garissa County

**Situation Before Intervention**

**Situation after Intervention**

The Intervention helped in supporting staff retention, hence improved service delivery

# Bura Abattoir in Garissa County

**Situation Before Intervention**

**Situation after Intervention**

# Maguto Water Project in Garissa County

**Situation Before Intervention**

**Situation After Intervention**

# Staff Houses at Maalimin Primary School, Garissa County

**Situation Before Intervention**

**Situation after Intervention**

The intervention contributed to teacher retention, resulting in increased

# Modogashe Girls Secondary School Library

This is 4 year old Girls School. The intervention helped to keep the girls in school to concentrate on studies. The school had minimized early marriages among local girls, according to the Principal.

# KAMUTHE PRIMARY SCHOOL KITCHEN

**Situation Before Intervention**

**Situation after Intervention**

# Lochor Angerengo Primary School in Turkana County

**Situation Before Intervention**

**Situation after Intervention**

The school serves both locals and refugee from Kakuma camp. The intervention has promoted

A result of KDRDIP interventions, Youths and Women are involved and Participate in Decision Making Processes on matters that Affect their Lives

# Women in Business in Lagdera, Garissa County

Project ICT Specialist training youths in Garissa on how to use KoBo Toolbox software to collect data for research. KDRDIP uses youths in the target areas to help in collecting and sharing of project information

# Community involvement in tendering decision making process

*This improved Good Governance and Transparency in Decentralized Units*

# KDRDIP Uses Media for Publicity and Knowledge Sharing

## IGAD delegation wowed by refugee hosts' community projects in Kenya

BY ERICK KYALO

The implementation of the Kenya Development Response to Displacement Impacts Project (KDRDIP) by local communities has attracted the attention of countries in the Horn of Africa to benchmark on the successes and challenges of the project.

KDRDIP is a World Bank

funded project at a cost of Sh10 billion for a period of five years to help the communities in Garissa, Wajir and Turkana to mitigate the effects of hosting refugees on their lives and livelihoods.

Country members of the Intergovernmental Authority on Development (IGAD) Ethiopia, Uganda, Djibouti, Sudan and Somalia joined the Kenyan officials to tour the development projects

in Lagdera and Dadaab sub counties in Garissa.

Among the development projects visited is a science laboratory at Modogashe Secondary School, construction of a medical lab at Dertu Health centre, bore-hole water project at Armed Tukale, and two medical laboratories at Modogashe Dispensary.

The IGAD delegation said they were impressed at how the project in Kenya

has helped to improve the lives of the refugee host communities, especially at a time the citizens are struggling with the effects of the current drought. "What we have seen is very good. How the communities have been trained to implement and manage the projects is what I will take home and tell our communities to do the same," said Djibouti's director of social development agency,

Mahdi Mohamed. Speaking at Armed Tukale after leading the IGAD delegates to inspect the Sh13.6 million Armed Tukale water project, KDRDIP's team leader Wilfred Omari said the project follows a community development approach where local communities take charge of projects from prioritization, planning and implementation.

"We advise them to use locally available resources

and contractors. They use simple advertising methods such as placing adverts on trees, public spaces and announcements in mosques and schools," Omari said.

Omari however regretted the drought situation in the region that has disrupted normal activities and patterns of settlement as people move in search of pasture leaving some projects underutilized or exposed to vandalism.

Thank You
